Multiverse Data Fellowship - DXC Technology Indicative Delivery Plan
Flying Start - 29 January 2021

Here in the Data Fellowship Team at Multiverse, we pride ourselves on the high impact, outstanding delivery of theory and content in bootcamps and module deliveries. An important part of our delivery plan also includes the apprentice applying this knowledge to their day-to-day role at work, and we have designed the programme to support this.

In addition, we believe that apprentices should have the opportunity to build their professional network, upskill, look after their well-being and socialise. That's where the Multiverse Community comes in. Apprentices will have unlimited access to the Community Hub, where they can sign up to events, webinars, networking opportunities, perks and much more.

Key Details about the Programme:

- Apprentices will attend **nine masterclasses** across the course of the programme. Masterclasses take place **remotely on Zoom** until further notice.
- These masterclasses are mandatory; if an apprentice cannot attend, they must contact data-fellowship-team@multiverse.io, and CC in their line manager and coach. Calendar invite to follow.
- Apprentices will attend a monthly, personalised 1-2-1 coaching session. This is a **45 minute** coach session. All coaching sessions will take place **remotely on Zoom** until further notice.
